FDA Requirement Statement

Permapack Inc. Bi-Oriented polypropylene films are manufactured for many industries including the food packaging industry.

*Polyolefins based homopolymers, copolymer, terpolymers and additives are used only from material sanctioned by the FDA REGULATIONS 21 CFR PARAGRAPHS 177.1520, 177.3130, 178-3287 AND 178.3860-184.

*CONEG (Heavy Metal Compliance) specifications as regards heavy metals in packaging (Cd + Cr +6 + Hg + Pb < 100 ppm)

*All polymers and additives entering in the composition of above mentioned BOPP Films, appear in the positive list of products accepted for fabrication of packaging material intended for food contact, as published by the BgVV – BGA VII Polypropylene.

*The monomers and other starting substances are listed in Annex II of Directive 002/72/EC.

Permapack products' features meet all the requirements established by the Food and Drug Administration (FDA), In chapter 177,1520 of the Code of Federal Regulations (CFR) in the United States.
